6. By the acquisition of the Municipal Electric Supply scheme, the power House has been taken over by Government but both the oil engines are not in use and the energy is supplied through High Power Transmittors. The Council therefore requests to recommend for handing over the Power House with the site for developing the same into a Public Park with a Physical Culture Institute.

GOVERNMENT ELECTRICITY DEPARTMENT.

:::::

From

The Chief Operation Engineer(North)
157, Mount Road, Madras-2.

To

The Secretary to Government,
Public Works Department, Madras.

No.696-C-51-57 dated 31-1-53.

Sir,

Sub: Electricity - Hospet Municipal Electrical Undertaking - Acquisition by Government - Handing over of Power House site to Hospet Municipality for coverting it into a Public Park.

Ref: P.W. endorsement No.90894 I/52-1 dated 31-10-52.

I forward herewith an extract from the field report from the Superintending Engineer, Rayalaseema Power System wherein it has been explained that the handing over of the Power House with the site to the municipality is not possible. In the circumstances explained therein, I agree with the Superintending Engineer, Rayalaseema Power System that the Hospet Municipality may be informed that Government are not able to hand over the Power House site and buildings to the Municipality in view of the present and future needs of the Electricity Department.

M. Subramanian

FOR CHIEF OPERATION ENGINEER(NORTH)

Encl:
N.M./31.1.

Extract from the letter No.DF 69/ 6877/52 dated 10-12-52 of the Assistant Engineer(Operation) Hospet to the Divisional Engineer(Electrical), Bellary with a copy to Superintending Engineer, Rayalaseema Power System.

---

1) Extent of Hospet Power House land taken over from Hospet Municipality on 16-3-51 is 2.76 acres.

2) The main Power House building is 63'-0 x 35'-0 the pump house is 55'-0 x 15'-0 and lastly the stores is 10'-0 x 10'-0.

3) Reasons for retention of the building: At present the old sets of Hospet Municipality Power House are still lying in the same building and hence the handing over of the Power House Building to the local Municipality does not arise as long as there are the old engine sets in the building.

4) The stores building is accomodating the Hospet Sub Division stores which contain operation and construction materials to the entire Hospet Sub Division covering 4 to 5 taluks of Bellary District, and this stores is likely to grow into a bigger and important one, once the Haravanahalli and other schemes as well as the Thungabhadra Scheme come into Operation.

5) Apart from the future possibilities of the wider usage of that land and building, it is to be stated that at present the Distribution, Revenue collection and fuse of calls office are all accomodated in a rented building which is on the outskirts of the town as the result of which the local people are put to inconvenience of going a long distance, for payments of dues, reporting fuse of calls and for consultation with the Departmental staff. Once the old Engine sets of Hospet Power House are removed from the Power House building the distribution office can be shifted to the Power House which is in proximate to the town and this would go a long way to relieve the public of the trouble of going a long distance for contacting the Departmental staff.

6) As the high tension and low tension lines traverse the vacant land of the Power House, it must be considered quite unsuitable for conversion to a public park.

As the Power House buildings and the vacant land round about is essentially required for 1)Accomodating the Distribution, revenue collection and fuse of call office; 2) accomodating the stores and the stored materials like rail poles site that will have to be stocked in the vacant land.

they cannot be rehanded over to Hospet Municipality for the purpose for which the Municipal authorities can seek better location which cannot be said to be not available in Hospet town.
